Identification Reference by Depositor:

Mouse Hybridoma: BM-7

Patent Deposit Designation

PTA-5632

The deposit was accompanied by:    a scientific description    a proposed taxonomic description indicated above.The deposit was received November 5, 2003 by this International Depository Authority and has been accepted.AT YOUR REQUEST: ☒ We will inform you of requests for the strain for 30 years.

The strain will be made available if a patent office, signatory to the Budapest Treaty certifies one's right to receive, or if a U.S. Patent is issued citing the strain, and ATCC is instructed by the United States Patent &amp; Trademark Office of the depositor to release said strain.

If the culture should die or be destroyed during the effective term of the deposit, it shall be your responsibility to replace it with living culture of the same.

The strain will be maintained for a period of at least 30 years from date of deposit, or five years after the most recent request for a sample, whichever is longer. The United States and many other countries are signatory to the Budapest Treaty.

The viability of the culture cited above was tested November 11, 2003. On that date, the culture was viable.

Continuation Sheet (PTOL-413B)

Application No. 09/125,751

Continuation of Substance of Interview including description of the general nature of what was discussed: It appears that the claims would be allowable if the claims were amended, for example to delete the comma and "and" in line 9 of claim 1 (and parallel amendments were done in other claims reciting identical language) and substituting therefore the phrase "further comprising". In addition, amendment of the claims to delete the term "same target" and substitute therefore EGP2 and MUC1, further, amending the claims to delete reference to "other carcinomas", and amending claim 21 to delete reference to MUC2 and 3. Examiner will further consider the case if these amendments are considered and allow the case pending that review and interference search.
